A screenshot of a computer screen displaying the Salesforce Setup interface. The top navigation bar shows three tabs: 'Platform Login Credentials - Pro' (active), 'Home | Salesforce', and 'Tabs | Salesforce'. The main content area is titled 'SETUP Tabs' and displays a form for creating a 'New Custom Object Tab'. The form includes fields for selecting an object ('Venue'), choosing a tab style ('Alarm clock'), and setting a splash page custom link ('None'). A large text input field for 'Description' is present. On the left sidebar, under 'User Interface', there are links for 'Rename Tabs and Labels' and 'Tabs'. A search bar at the top right contains the text 'Search Setup'. The bottom of the screen shows the Windows taskbar with various pinned icons and the system tray.

**Fields & Relationships**

- Formula
- Roll-Up Summary
- Lookup Relationship
- Master-Detail Relationship**
- External Lookup Relationship
- Checkbox
- Currency
- Date
- Date/Time
- Email

A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Allows users to select a True (checked) or False (unchecked) value.

Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.

Allows users to enter a date or pick a date from a popup calendar.

Allows users to enter a date and time, or pick a date from a popup calendar. When users click a date in the pop-up, that date and the current time are entered into the Date/Time field.

Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.

The screenshot shows a computer monitor displaying a Salesforce Developer Console window. The window title is "DropOffTrigger.apxt". The code editor contains the following Apex trigger:

```
1 trigger DropOffTrigger on Drop_Off_point__c (before insert) {
2
3     for(Drop_Off_point__c Drop : Trigger.new){
4
5         Drop.Distance__c = Drop.distance__c;
6
7     }
8
9 }
```

The browser's address bar shows the URL: `thesmartinternz1-dev-ed.develop.my.salesforce.com/_ui/common/apex/debug/ApexCSIPage`. The top navigation bar includes links for Student, Home | Salesforce, Developer Console, Drop-Off Point | Salesforce, and Venue Form - V1. The bottom of the screen features a navigation bar with tabs for Logs, Tests, Checkpoints, Query Editor, View State, Progress, and Problems, with the Problems tab currently selected. A watermark in the bottom right corner reads "Activate Windows Go to Settings to activate Windows."

The screenshot shows the Salesforce Setup interface for creating a new Custom Report Type. On the left, there's a sidebar with 'Feature Settings' expanded, showing 'Analytics' and 'Reports & Dashboards' with 'Report Types' selected. The main area is titled 'New Custom Report Type' and '2 Define Report Records Set'. It asks to 'Select related objects to define which records are included in reports using this report type.' A box labeled 'A Volunteers' is highlighted as the 'Primary Object', with a sub-instruction '(Click to relate another object)'. On the right, there's a watermark for 'Activate Windows' with the text 'Go to Settings to activate Windows'. At the bottom, there are 'Cancel' and 'Save' buttons. The browser address bar shows the URL for the setup page. The top of the screen has tabs for Recent, Reports, and Salesforce, and the title bar says 'UG LAB -I 10' and 'VISHWOL'.
